

# Picture of Multiport Valve

**FILTER** – Circulates water through the filter back into water source.

**RINSE** – Rinses filter.

**RECIRCULATE** – Circulates water back into water source, bypassing filter.

**BACKWASH** – Cleans filter out to waste pipe.

**WASTE** – Empties water source out to waste pipe, bypassing filter.

**CLOSED** – Closes filter and does not let water pass.

The water source can be a combination of a Pool, Water Tank and/or Underwater Treadmill.
