# Pool Eraser

## Efficient

Pool Eraser is made from a patented plastic sponge material whose surface flaunts the ability to harden when humidified. The hardened surface remains nevertheless pliable allowing for easy and efficient cleaning; even those inaccessible nooks and crannies.

## Ecological

Without the use of detergents or chemical products, Pool Erasure enables you to eliminate stubborn marks and stains with a simple scrub. It is particularly useful on the waterline but also adds sparkle to all the plastic items in your pool or spa area; skimmers, shutters, covers, stairs, patio furniture, etc.

## Practical

Once dampened, Pool Erasure is used as an eraser, in other words, simply rubbing it on a surface guarantees results. You'll notice that the Pool Erasure disintegrates like an eraser which explains its exceptional efficiency.

Use on all the surfaces in and around your pool area: liners, tiles, fiberglass, stairs, shutters, covers, plastic patio furniture, etc.

However, Pool Erasure is an abrasive product so for varnished or delicate surfaces, we suggest doing a spot test on a hidden area beforehand – don't use it on the finish of your car for example.

## **Each box includes:**

2 big erasers for large surface areas

3 smaller ones for those little, hard-to-reach areas.
