

# Blue Connect Plus

Want to be able to look after your pool when your away?

Want to have real time, instant water data?

**Blue Connect**, the smart pool analyser, is a smart device that combines a water quality sensor and smart algorithms which mix water data, weather data and user data.

**Blue Connect** and its smartphone app help you look after your pool 24/7, even if you are away. No more uncertainty about what is happening in your pool.

The **Blue Connect** comes complete with a Blue Wi-Fi Extender, this provides the possibility to use the **Blue Connect** with a Wi-Fi network.

The user can access the data for the swimming pool whenever desired on a smartphone thanks to the **Blue Connect App**:

- Notifications are sent when an action is required for example if more chlorine is needed.
- Personalised advice helps to optimise the use of chemicals.
- Provides peace of mind for the maintenance of the pool.
- Multiple users have access to the data.

## **Features**

### **4-in-1 Sensor**

- pH
- Redox / ORP (Chlorine, Bromine & Salt)
- Conductivity
- Water temperature

### **Plug & Play or Inline**

**Blue Connect** is a floating device easily installed into the pool directly or alternatively, it can be installed into the pipework for the pool in the plant room. The battery and the probe can be changed without tools and in just a few seconds.

### **Always Connected**

- Bluetooth: Take and instant measure directly with Bluetooth
- Wi-Fi: Use **Blue Connect** with your Wi-Fi thanks to a Blue Extender.
