

Derwent and Lakes pools are delivered without any side trim panels to enable you to design your own external ramp and blend the décor right up to the top of the pool.

Below are some pictures that help to show the various stages of installation and some different ramp design ideas.

Derwent ready for delivery

Derwent positioned in building ready for installation

Derwent in position and covered to protect while building work continues

Derwent being filled during installation

Preparation works prior to install included wooden ramp ready for covering with Altro flooring.
